

Annual Report
2018/2019

STADIUM OPERATIONS

San Siro Stadium

The **San Siro Stadium** is the location that has been hosting AC Milan's home matches for over 90 years. It has been Inaugurated on September 19, 1926 under the chairmanship of Piero Pirelli and the initial structure reached a capacity of 35,000-40,000 spectators, a figure which was expected to increase significantly thanks to the various renovations over the years.

To date, San Siro is by far the largest stadium in Italy with over 75,000 seats; the structure stands out also for the compliance with high standards of safety and comfort. The stadium is included in the **UEFA Category 4**.

Stadium Operations management

The main objectives of AC Milan's Stadium Operations management are:

- To guarantee the best planning and management of all pre-, during and post-match activities inside San Siro during the matches played by the Club, including the direct management of booking services.
- To participate in the correct and timely management of San Siro stadium, in collaboration with the company M-I Stadio and FC Inter, proposing and planning ordinary and extraordinary maintenance operations in order to meet the Club's needs and ensure the proper carrying out of activities.

There are many activities that need to be planned, organized and managed by the Stadium Operations management to meet all the needs of our stakeholders (**fans, sponsors, first team, top management, entities and institutions, media...**) and to offer them the best possible experience at the stadium.

Vip Box: 545 (Vip Box + Authorities Stand + Executive Stands)

Press Seats: 255

Seats for disables people: 200

(+ 200 accompanying persons)

M-I Stadio Srl

M-I Stadio Srl is the company, shared between F.C. Internazionale and A.C. Milan, which manages the activities of the Stadium on behalf of the Clubs. The registered office is in Milan, Piazzale Angelo Moratti snc and the fully paid-up share capital amounts to € 1,000,000.

The safety of all those who take part in the live event is very important for us: for this purpose, we are very scrupulous in ensuring the best controls and in supervising fans' access and exit, everything in close collaboration with the police and the relevant Staff, to comply with the rules and regulations of Lega Serie A, FIGC and UEFA.

Among the many activities to be supervised, the coordination of logistical and entertainment activities inside the stadium is significantly important: our concern is to ensure optimum efficiency of the infrastructures during home matches, in compliance with corporate guidelines and in compliance with current regulations.

All the staff collaborating during the Match Day deserves a special mention. Every match played at San Siro Stadium has at least 40,000 spectators, with constant peaks of over 70,000 people during the big matches featuring FC Juventus and FC Inter. These "Top Events" need experienced staff, trained and ready to handle stress/emergency situations.

In particular, each match sees the presence of:

- N Stewards 820
- N Service Staff 1500
- N Service Staff (Catering) 110

San Siro Stadium – Structural Interventions

In the 2018/2019 season, San Siro stadium underwent numerous improvements:

- Expansion of the EVAC System at the Operations Center (GOS)
- Integration of the Smoke Detection System at the Operations Center (GOS)
- Union of Red Sky Box n. 9 and n.10 (Presidential)
- Remodeling of the playground lighting system at the Stadium Reception
- Remodeling of the lighting system of the third tier stands with LED technology

As regards the 2019/2020 season, the following maintenance, renovation and improvement works will be carried out at the San Siro Stadium:

- Gas Radon intake system in the underground garage*
- Pre-filtering fencing for guest fan entrances with Betafence Elements (Gate n.6 and n.10) *
- Renovation of guest changing room with furniture replacement *
- Technological renewal of the stadium's network system and first access control, including high availability new servers *
- UPS adaptation to security systems service *
- New bars for access control *
- Creation of new executive stages for the Orange Sky Lounge 1 and 2
- Renewal of Red and Orange SkyBoxes
- Reclamation of Stadium Electrical Installations
- Renewal of Mixed Zone
- Renewal of Press conference room lighting system
- New lighting system for the underground Garage
